

## Award Session:

**November 12, 2017**

### **Hall 1 (10:30 - 12:00 hours)**

- Assessment of Oxidative Stress Parameter and its Correlation with Nerve Conduction Velocity in Patients of Type 2 Diabetes Mellitus with Peripheral Neuropathy.  
*Anwar Hasan Siddiqui, Aligarh, India*
- Resting State Network Differences Between Gelastic Seizures with and Without Hypothalamic Hamartoma.  
*Bhargava GK, Bengaluru, India*
- Attentional Gradient in Touch: an MEG Study.  
*Tetsuo Kida, Okazaki, Japan*
- Role of Selective Attention and Emotional Processing During Multimodal Task: Colavita Effect in Human Face Recognition.  
*Swathi Anil, Trivandrum, India*
- Onset and Propagation of Epileptic Discharges in Juvenile Myoclonic Epilepsy involves Restricted Cortical Network: An EEG Source Localization Evidence.  
*Suriya Prakash Muthukrishnan, New Delhi, India*
- Exploring the Neurophysiology of Sensory Trick in Cervical Dystonia using TMS-EEG  
*Nivethida Thirugnanasambandam, Bethesda, United States.*
- Sleep in Parkinsonism: A Polysomnography Based Study from Tertiary Care Centre in South India.  
*Dushyanth Jasti, Tirupati, India*

### **Hall 2 (10:30 - 12:00 hours)**

- Sequential Central Motor Conduction Time by Transcranial Magnetic Stimulation on Neck Flexion in Patients with Brachial Monomelic Amyotrophy / Hirayama Disease.  
*Veeramani Preethish-Kumar, Bangalore, India*

- Clinical and Electrophysiological Characteristics of Guillain Barre Syndrome with Antibodies to Ganglioside Complexes.  
*Madhu Nagappa, Bangalore, India*
- A Clinical and Electrophysiological Study of Peripheral Neuropathies in Chronic Kidney Disease in Patients with Respect To Dialysis : our Experience from a Tertiary Care Centre in South India.  
*Sarat Mallipeddi, Tirupati, India*
- High Resolution Ultrasound Study of Brachial Plexus: Normative Data from Asian Indian Population.  
*Suryanarayana Sharma P M, Bangalore, India*
- Interaction of Cathodal and Anodal Stimulations in Nerve Conduction Studies.  
*Takamichi Kanbayashi, Tokyo, Japan*
- Different Alarm Criteria in Muscle MEP Between Cervical and Thoracic OPLL Surgery.  
*Yong Chul Kwon, Sung-Nam, Republic of Korea*
- C5/C6/C7 Myotome of Upper Limb Muscles Documented By MRI-Confirmed Cervical Spondylotic Radiculopathy.  
*Yuichi Furukawa, Itabasi, Japan*
